

THC-A

THC-A is a unique cannabinoid. As permitted by the 2018 Farm Bill, our products contain less than 0.3% THC. Through combustion, the THC-A flower transforms into psychoactive Delta-9 THC, providing a smooth, enjoyable, legal traditional cannabis experience.

THC-A PRODUCTS

Smokables

- Pre-Rolls
- Flower

HEMP *for the* PEOPLE

Carolina Crude

Our **Carolina Crude** is a lovely, decadent topical that begins with an all-natural *whole plant extract*. It contains the fats, lipids, and chlorophyll of the cannabis plant, as well as CBD and other components from the plant, for a complex, deeply soothing product. With a base of Coconut MCT oil, **Carolina Crude Oil** is potent and effective, and never diluted with menthols or fillers. And try blending our **Crude Concentrate** with your own warmed oil or favorite lotion!

CBD

Full Spectrum CBD contains numerous cannabinoid compounds from the cannabis plant, with very low levels of THC. You should not feel any intoxicating effects with this product.

Broad Spectrum CBD is similar to Full-Spectrum CBD in that it contains various active cannabis compounds. However, Broad Spectrum CBD contains no THC.*

For a full list of our products, visit www.cannabeter.farm

* Our Broad Spectrum CBD products contain less than .3% THC, as required by law. Over time, however, levels can build to amounts that are detectable by drug tests. Enjoy with caution.

Delta 8

Delta 8 THC is one of many cannabinoids naturally found in small amounts in the cannabis plant. Many people report the Delta 8 effect to include pleasant body-heaviness, and even a bit of drowsiness.

DELTA 8 PRODUCTS

Gummies

- 40 mg Citrus-Flavored
- 80 mg Hemp-Flavored
- Combo Gummies (60 mg Delta 8 *plus* 13 mg Delta 9)

Smokables

- Disposable Wax Burners
- Wax Concentrates
- Shake
- Pre-Rolls
- Moonrocks

Oils

- Delta 8 Distillate
- Delta 8 & CBD Distillate

You must be 21 years of age or older to purchase. Please enjoy responsibly!

Delta 9

Delta 9 THC is the main psychoactive cannabinoid naturally found in cannabis. Many describe the Delta 9 effect as a light, euphoric and happy feeling.

DELTA 9 PRODUCTS

- 10 mg Citrus-Flavored Gummies
- Delta 9/CBD/CBN Mixed Berry Gummies
- Combo Gummies (60 mg Delta 8 *plus* 13 mg Delta 9)
- 150 mg Strawberry Syrup

TIPS: New consumers might want to start with one quarter to one half of a gummy. Experienced consumers might begin with one half or one whole gummy. It could take between 30 minutes and 2 hours before you feel the full effect, so we recommend you wait the full 2 hours before indulging in more.

TOO HIGH? Don't panic! It will wear off. In the meantime, try taking a shower, a nap, or a walk; eat some food; drink lots of water; try some CBD; eat peppercorns; cut a fresh lemon and smell its oils; take some ibuprofen! All can help reduce cannabis effects.

All our products are Farm Bill Compliant, and contain less than 0.3% THC.
